MOLGRA

Línea Collection

Our “LÍNEA” collection pushes the design of the moldings upwards, following our trend of conceiving exclusive products.

They are two profiles in high quality finger-jointed Pine in 38x21 and 79x30 mm, with a slight slope towards the inside of the frame, whose content is highlighted by a superb double metallic edge. We marked a channel curved between the two threads, that receives a painted color according to the molding.

The current colors have been chosen with a voluntary “gloss” effect and a fine wood grain in the form of fine light stripes: black, walnut, gray, champagne. The Set provides a unique, high-class collection, never seen before.

This avant-garde design mixes both retro and modern trends, without losing a classic touch due to the double edge marking. Its manufacture requires an exciting job of great care and several passes, between gesso layers, stamping foils and thin layers of paint. However, the price of the LÍNEA keeps it affordable in proportion to its quality.
