Noir

Noir Collection

The Noir Collection is a sophisticated evolution of classic black moldings, achieving a visual effect similar to the texture of oak painted in black. Made from finger-jointed pine sourced from responsibly managed forests, these moldings are coated with a polypropylene film that meets REACh standards and contains 50% post-industrial recycled polymers. Additionally, their formulation is free of formaldehyde and heavy metals, reinforcing their commitment to sustainability.

This collection offers versatile solutions for all types of framing, including prints, watercolors, canvases, and especially black-and-white photographs. Its contemporary finish and the aesthetic security of black make it an ideal choice for those seeking elegance and environmental awareness in a single product.
