MOLGRA COLLECTION

MDF

MDF Collection

We are pleased to introduce the MDF collection, a series of mouldings that reproduce the warm aesthetics of natural wood, but at the same time use a more affordable and recycled material.

We work with an exclusive manufacturer of boards in Europe, which provides us with an MDF with a low resin (formaldehyde) rate, meeting the new environmental requirements, with TSCA / CARB2 / EPA certification.

The result is a moulding for daily works, easy to work: it cuts and staples like the normal wood. Then, its decorations combine with a huge variety of interiors, enduring many years in dry environments.
