Ribbons specially designed to hang sheets of Dibond or other materials, separated from the wall.

Its wedge shape achieves the total adjustment of the works to the surface of the wall in an easy way, applying several possible assemblies.

Stretcher bars in finger-jointed pinewood

1787/000 40x20mm

1786/000 30x14mm

Strecher bars in finger-joined pinewood, specially designed to easily hang any picture or frame on the wall.
The shape of the profile, with its inclined interior channel, allows the strip to be screwed, nailed or stapled to the molding on the back of the picture, thus giving narrow moldings greater resistance on the hanging side.

We attach a cross-sectional photomontage, showing an example. Attached to the picture, the strip with its pronounced lower bevel allows a perfect fit on the hooks or screws placed on the wall, keeping the picture totally vertical, in this way we can move the picture to the right or left according to convenience, without making new holes. It is served in individual strips of approximately 3 meters.
