Toledo

MOLGRA COLLECTION

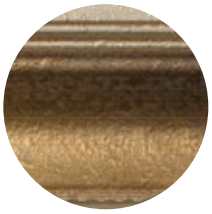

Toledo Collection

With the Toledo collection, Molgra keeps updating classic mouldings for more contemporary interiors. Toledo has an old patina slightly textured in black, gold and silver, and designed on larger profiles than the traditional ones.

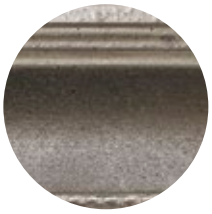

It is a very easy-to-work set of products, ideal for mirrors and traditional paintings. It also fits with modern works such as charcoals, portraits and even abstract works. The Toledo collection is made with finger-jointed pine pro- files, which have been coated with several layers of gesso to achieve a high quality finish.

The texture of the black profiles give a warm feeling similar to what the Ebony, and the rabbet with the pearl edge gives it an elegant appearance. The satin-like pati- na of the profiles in gold and silver are suitable for larger picture frames, and even for more exclusive works. They also fit perfectly with modern houses.

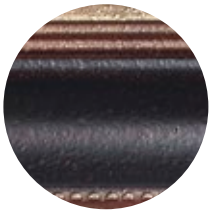

It is important to add that all these profiles have a straight outer edge, and they can be assembled with other mold- ings or floaters from our collections.
